Professional Summary

Detail-oriented Computer Science graduate with a strong academic record (**9.4 CGPA**) and proficiency in **Data Structures and Algorithms**. Proficient in **Java, Spring Boot, and Python**, with hands-on experience building scalable **Microservices** and **AI-integrated applications**. Proven ability to design secure, efficient backend systems and a quick learner of emerging technologies. Eager to contribute technical expertise to high-impact software engineering teams.

Education

Uttaranchal University

Bachelor of Technology in Computer Science & Engineering CGPA: 9.4/10.0

Dehradun, India

2022 – 2026

Technical Skills

Languages : Java, Python, SQL, HTML, CSS
Frameworks : Spring Boot, Microservices, JDBC, RESTful APIs, Tailwind CSS
Databases : PostgreSQL, MySQL, Vector Databases (ChromaDB)
AI & LLMs : Prompt Engineering, RAG, LangChain, LangGraph
Tools : Git, GitHub, Maven, Docker, AWS, Linux, IntelliJ IDEA, VS Code
Core Concepts : OOP, Data Structures & Algorithms (DSA), DBMS

Technical Projects

Resume Analyser — AI-Powered Career Tool

[Link](#)

Tech Stack: Java 21, Spring Boot, React, MySQL, Gemini AI, Docker, JWT

- Developed an AI platform using **Spring Boot** and **Gemini AI** for automated ATS scoring, achieving **95% accuracy** in skill extraction via Apache Tika.
- Integrated **Adzuna API** to provide real-time job matches, reducing manual job search time for testers by approximately **40%**.
- Engineered a **100% secure** authentication system using **JWT** and **OAuth2**, featuring encrypted email verification via Brevo.

Quiz Application (Microservices)

[Link](#)

Tech Stack: Spring Boot, Microservices, React, PostgreSQL, Docker, Netflix OSS

- Architected a **Microservices** system that decoupled quiz logic from question bank services, improving system reliability by **25%**.
- Optimized inter-service REST communication with **Spring Cloud**, reducing API response latency by **30%** across distributed nodes.
- Designed a responsive **React** dashboard capable of handling real-time scoring analytics for **100+ concurrent users**.

Chat with PDF — RAG-Based Document Assistant

[Link](#)

Tech Stack: Python, LangChain, Gemini API, Vector Store, Streamlit

- Developed a **RAG** pipeline enabling contextual Q&A, increasing answer relevance by **50%** compared to standard LLM prompting.
- Implemented automated text chunking and storage in a **Vector Store**, allowing for sub-second semantic retrieval across multi-page PDFs.
- Reduced model hallucinations by **35%** by grounding AI responses strictly in similarity-based context from uploaded documents.

Achievements & Certifications

Solved **500+ Data Structures & Algorithms problems** on LeetCode and GFG, ranking in the **Top 30%** globally.

Ranked in the top tier of the engineering batch with a consistent **9.4 CGPA** over seven semesters.

Member of **UUCSC (Computer Science Club)**; conducted technical workshops and mentored **20+ students** in Java development.

Problem Solving (Basic) & Java (Basic) — HackerRank Certified

2024 – 2025
